

Protecting sea bass

Proposal on monthly catch limits and closed area

Sea bass a stock in decline

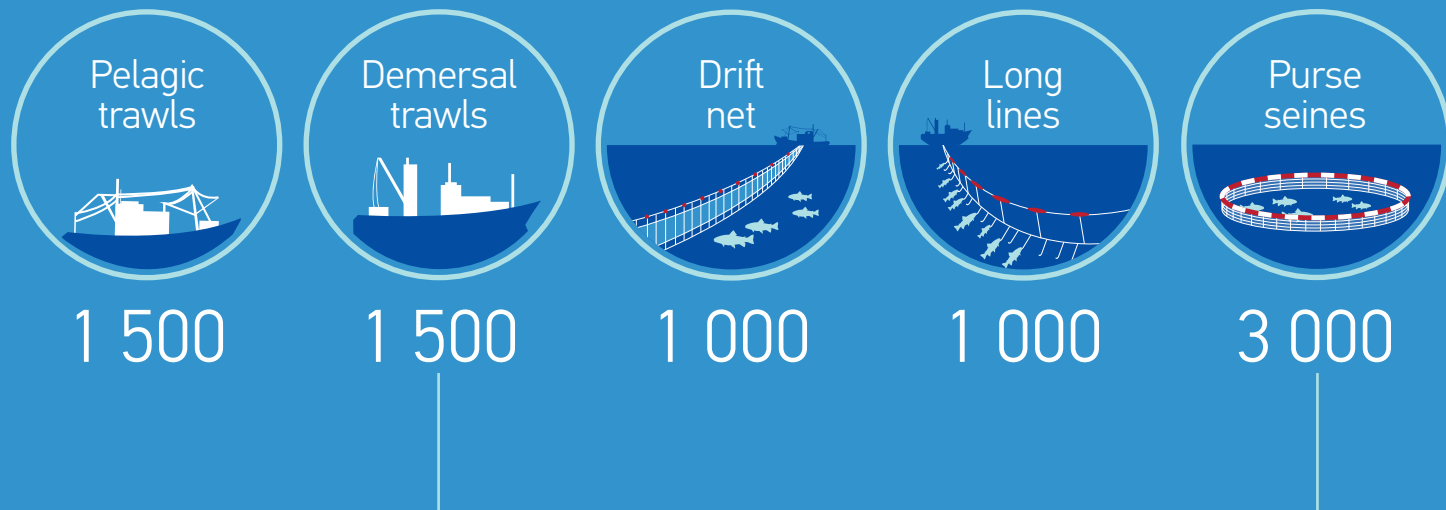

Below this limit, reproductive capacity risks being severely inhibited

We are witnessing a rapid decline in sea bass stocks that could lead to a collapse

Source: ICES 2014, advice for seabass in southern North Sea, Channel, Celtic Sea, Irish Sea

Proposal on monthly catch limits and closed area

Maximum catch of sea bass permitted per vessel per calendar month (in kg)

The response to the proposal will be decided by the Council of Fisheries Ministers, where all 28 EU Member States are represented.

Area closed for commercial fishing
